SUMMARY

Senior full-stack/product engineer with 7+ years building enterprise automation platforms, workflow builders, and shipped SaaS/mobile products. Strongest in TypeScript, React, Node.js, PostgreSQL/Supabase, and complex data workflows across healthcare, financial services, telecom, and security/compliance contexts. Known for turning ambiguous operational problems into durable software with clean UX, validated pipelines, and production-grade release practices.

EXPERIENCE

12/2021 - Present | Full Stack Software Engineer | VSO, LLC, Remote

- Led development of FogLifter and a drag-and-drop Pipeline Builder, replacing hand-written JSON workflows with visual configuration, versioning, validation, and safer operational handoffs.
- Delivered custom automation pipelines for Kaiser Permanente, Kyndryl, Raytheon, and Disney across ingestion, transformation, reporting, vulnerability workflows, and invoice rollups.
- Built FogLifter VulnRx to automate compliance policy enforcement, maintenance windows, patch exemptions, and attestation workflows across 60,000+ enterprise assets.
- Built a telecom billing application for Walt Disney Company integrated with FogLifter, ServiceNow, Tangoe, and Spok to track services, payments, invoices, and account balances as the source of truth for Orlando business units.

07/2019 - 12/2021 | Full Stack Software Engineer | Citigroup, Inc., Tampa, FL

- Developed IBM BPM/BAW, Java, and MSSQL automations that reduced account-opening cycle time from up to 2 months to 2 days.
- Converted from contractor to direct hire after sustained delivery across business-critical financial services workflows.

SELECTED PRODUCT WORK

Carvd Studio (Personal Product) | carvd-studio.com

- Built and shipped a cross-platform desktop app for furniture and cabinetry design with 3D editing, cut-list generation, PDF exports, and offline-first packaging.

Myrivo (Personal Product) | myrivo.app

- Built a multi-tenant storefront SaaS for small product brands with branded storefronts, seller operations, product management, checkout, fulfillment, promotions, and Stripe-backed commerce patterns.

Curby (Personal Product) | getcurby.app

- Built mobile and web product surfaces for a hyperlocal free-stuff marketplace with shared domain logic, Supabase-backed auth/data workflows, geospatial feeds, and role-based access policies.

Spark (Personal Product) | spark-rm.com

- Built an AI relationship manager with daily check-in suggestions, drafted messages, contact memory, privacy-conscious AI workflows, and App Store subscription tiers.

EDUCATION & CERTIFICATIONS

2014 - 2018 | Bachelor of Science in Mathematics | Benedictine College

2023 | Certified ScrumMaster | Scrum Alliance

TECHNICAL SKILLS
